

IN THE PROVINCIAL COURT OF ALBERTA
CRIMINAL DIVISION

BETWEEN:

HER MAJESTY THE QUEEN

- and -

PETER J. GREENWAYS

I HEREBY CERTIFY THIS TO BE A
TRUE COPY OF THE ORIGINAL OF
WHICH IT PURPORTS TO BE A COPY.

DATED THIS 12 DAY OF Aug 20 15

[Signature]
Clerk of the Provincial Court of Alberta

BEFORE THE HONOURABLE) On Wednesday, the 12th day of
JUDGE F. A. DAY)
AT EDMONTON, ALBERTA) August, 2015.

**ORDER PURSUANT TO SECTION 234(1)(c) OF THE
ENVIRONMENTAL PROTECTION AND ENHANCEMENT ACT**

WHEREAS PETER J. GREENWAYS stands convicted of the following offences
contrary to the *Environmental Protection and Enhancement Act*:

On or between the 13th day of August 2007 and the 23rd day of May
2012, at or near Edmonton, Alberta, did accept for transportation or
storage hazardous waste without the hazardous waste being
accompanied by a manifest that is completed in accordance with the
regulations, accurately identifies the quantity, composition and points of
origin and destination of the hazardous waste and contains the personal
identification number of each person consigning, transporting or accepting

the waste, contrary to s. 191 of the *Environmental Protection and Enhancement Act*, and did thereby commit an offence contrary to section 227(j) of the *Environmental Protection and Enhancement Act*.

and

On or between the 13th day of August 2007 and the 23rd day of May 2012, at or near Edmonton, Alberta, did consign or transport hazardous waste without the waste being accompanied by a manifest that is completed in accordance with the regulations, accurately identifies the quantity, composition and points of origin and destination of the hazardous waste and contains the personal identification number of each person consigning, transporting or accepting the waste, contrary to s. 191 of the *Environmental Protection and Enhancement Act*, and did thereby commit an offence contrary to section 227(j) of the *Environmental Protection and Enhancement Act*.

AND WHEREAS in addition to a ^{“penalty”} fine of \$ ^{“50,000”} _____ as against PETER J. GREENWAYS, imposed under the *Environmental Protection and Enhancement Act*, inclusive of victim fine surcharge, and having regard to the nature of the offence and circumstances surrounding its commission;
^{“also having regard to the \$7,500 paid pursuant to the Publication Order”}

AND WHEREAS the Court has already ordered pursuant to s. 234(1)(e) of the *Environmental Protection and Enhancement Act* that PETER J. GREENWAYS pay \$7,500.00 into Court to secure the Court’s ability to effectively make a publication order under s. 234(1)(c) of the *Environmental Protection and Enhancement Act*;

AND WHEREAS the Clerk advises that PETER J. GREENWAYS did pay the \$7,500.00 into Court as ordered today;

AND WHEREAS this order is necessary to prevent conduct that may result in the continuation or repetition of the offence;

IT IS HEREBY ORDERED THAT:

1. PETER J. GREENWAYS will allow Alberta Environment and Parks, Alberta Transportation, the City of Edmonton or any combination of the foregoing to publish, archive, and freely distribute, without compensation and without restriction, the two sided poster attached hereto as Schedule "A".
2. Alberta Environment and Parks is permitted to further refine and edit the two sided poster attached as Schedule "A" prior to publication. Such edits can be for both substance and form. In particular, Alberta Environment and Parks is permitted to make edits to further improve the formatting and design of the document. Alberta Environment and Parks is also permitted to make edits to ensure that the document best conveys how to handle spills or releases according to law, including liaising with the City of Edmonton, Alberta Transportation and any other entity that has expertise in hazardous waste/recyclables or dangerous goods to ensure that the document is substantively correct.
3. The Clerk of the Court is directed to pay the cost to publish the initial publication of Schedule "A" from the funds paid into Court pursuant to my August 4, 2015 "Order Pursuant to Section 234(1)(e) of the *Environmental Protection and Enhancement Act*". Those costs will be paid pursuant to the Capital Colour Press (1992) Ltd. Estimate E-512205 attached as Schedule "B". Upon Environmental Protection Officer Hanneke Brooymans of Alberta Environment and Parks advising the Clerk that Alberta Environment and Parks has given "Proof Approval" for the document, the Clerk will provide Environmental Protection Officer

Hanneke Brooymans with a cheque payable to "Capital Colour Press (1992) Ltd." for one half of the total cost of the Estimate. Upon Environmental Protection Officer Hanneke Brooymans of Alberta Environment and Parks advising the Clerk that the document has been delivered, the Clerk will provide Environmental Protection Officer Hanneke Brooymans with a cheque payable to "Capital Colour Press (1992) Ltd." for the balance of the cost of publication. If change orders are necessary or unexpected printing costs otherwise arise, Alberta Environment and Parks is hereby authorized to approve variations to the work promised to be delivered pursuant to Estimate E-512205 on the condition that Environmental Protection Officer Hanneke Brooymans will provide the Clerk of the Court updated Invoices or Estimates prior to seeking the payment of the Capital Colour Press (1992) Ltd. account.

4. If any funds are left paid into Court after the publication of Schedule "A", the Clerk of the Court will use such funds to pay any fine that PETER J. GREENWAYS still owes to this Honourable Court. If PETER J. GREENWAYS owes nothing to this Honourable Court, the Clerk of the Court will forward a cheque payable to PETER J. GREENWAYS for the balance of the funds paid into Court.
5. Upon completion of the publication of Schedule "A" as edited, Environmental Protection Officer Hanneke Brooymans or her designate is directed to forward a copy of the final published document to this Honourable Court along with a report confirming that the terms of this Order have been carried out.

DATED this 12 day of August, 2015, in Edmonton, in the Province of Alberta.

66 F.A. Day
Judge of the Provincial Court of Alberta

Schedule "A"

HOW TO HANDLE A SPILL

- don't delay, protect our waterways

CONTAIN

If you have a spill or release, do your best to keep it in as small an area as possible, and away from city drainage systems and natural waterbodies

CALL

Report the spill immediately to both the Alberta Government (1-800-222-6514) and your local municipality (for example, call 311 in Edmonton)

CLEAN

Clean up the spill in accordance with relevant federal, provincial and municipal legislation, in a manner that is protective of both human health and the environment

Improper spill responses can harm waterways

There's a right way and a wrong way to deal with a spill or release and the consequences to individuals and the environment can differ greatly depending on the chosen response.

When Peter J. Greenways tipped over a tank at his electroplating business and the tank's secondary containment failed, spilling some liquid onto the ground, his response caused all kinds of headaches.

For one thing, he did not report the spill, as required. His neighbour did. And when a city inspector arrived to look into the incident, Mr. Greenways told him there was no problem and that he'd cleaned it up. He offered no information on the spill.

The inspector could see something in the catch basin, though, and suspected there was still a problem. He called the city's hazardous materials team. The team also received no cooperation from Mr. Greenways. So they did the safest thing they could think of, which was to flood the area and wash everything, in a diluted state, down the storm drain. This pushed whatever was in the catch basin into the Mill Creek Ravine and from there into the North Saskatchewan River.

"You have to find out what it is to deal with it," said Mel Longden, the city inspector who showed up that day. "If they won't tell me, then I call haz mat." He also calls the provincial government and maybe the federal government, too. "Now you're dealing with not just one individual but the province, the feds."

After the incident was resolved, investigators took over. What they discovered led to a prosecution, with the provincial government laying charges against Mr. Greenways and his company in September 2013.

The stress of the prosecution lingered until August 2015 when the matter was finally resolved with Mr. Greenways pleading guilty to two counts under the provincial Environmental Protection and Enhancement Act. He had to pay a fine and cover the cost of sending this publication to businesses in the Mill Creek drainage basin. "It's a very, very wearing thing," Mr. Greenways said, adding the prosecution has been weighing on his mind. It preoccupied his thoughts so much, his wife told him he was walking around like a "zombie."

And then there is the unwelcome "stigma" associated with a prosecution, he added. "Anybody going on the internet sees it forever."

Obviously, it's important to be very careful when handling chemicals of any kind. But if there is an accident resulting in a spill or release, there is a specific way to deal responsibly with the incident.

The spill or release should be quickly contained, to reduce the likelihood of harm to people or the environment. Secondly, the spill should be reported immediately, both to the City of Edmonton through a call to 311, and to the Alberta Government, by calling 1-800-222-6514.

You can call both numbers 24 hours a day, every day of the year. When you call the 1-800 number, an operator will ask for a description of the spill, including the products spilled, location, quantity and whether or not it happened near any waterways, such as creeks, streams, rivers or wetlands. They also want to know how the spill is being contained.

Information like this is vital to those showing up at the scene.

"Our biggest concern when we show up is you're wondering how it's going to impact public health and safety," said Tanya Hunter, a City of Edmonton industrial wastewater investigator.

Responders want to see the material safety data sheets for the chemicals that were released so they can figure out how best to treat it so no one is injured and how to get it out of any waterbody it may have entered.

The Mill Creek drainage area is frequently the victim of all kinds of spills and releases. The incidents were frequent enough that the city installed an oil separator along the creek to remove as much oil as possible. Since the separator began operating in 2000, Mill Creek Ravine Park users say the creek looks cleaner. Measurements of the oil collected show the separator collects as much as 3.5 litres of oil per month. That's a lot, considering one drop of oil can render up to 25 litres of water unfit for drinking. Although the separator does a lot to help, it's not a perfect system. During heavy rainfall events, the separator has to be taken offline so it doesn't cause upstream flooding. Ultimately, the best solution is to prevent toxic chemicals from getting into our drainage system and our waterways in the first place.

The Mill Creek Ravine oil separator began operations in 2000.
