

Application for Exemption from Requirement to Obtain a Reclamation Certificate Due to Presence of an Overlapping Activity¹

This form **must** accompany the application for reclamation certificate from Operator A and be signed by **both** operators. (When the site is completely overlapped no application for reclamation certificate is required.) The area to be certified **and** the area being exempted must be clearly identified on the survey plan submitted.

Please note that while the application form contemplates agreement between the operators of overlapping activities and mutual agreement is ideal, consent is **not** required. The *Conservation and Reclamation Regulation* allows the Alberta Environment and Parks Director/Alberta Energy Regulator to exempt an Operator from getting a reclamation certificate when the activity has been overlapped by another activity that meets the definition of specified land (s. 15.1(1)(b)). Consequently, an overlapped operator may still apply to Alberta Environment and Parks or the Alberta Energy Regulator, as the case may be, for an overlapping exemption where the Operator is unable to obtain consent from the overlapping party.

Operator A Information:

Operator (Company) Name: _____

Alberta Energy Regulator License Number or
Alberta Environment and Parks Approval/Registration Number: _____

Type of Specified Land: well pipeline pit mine railway roadway

Other: _____

Location of Specified Land: LSD _____ Sec _____ Twp _____ Rge _____ W _____ M

Date of Construction: _____ Date of Reclamation: _____

Size of Specified Land: _____ ha Size of Area Proposed for Exemption: _____ ha

Remaining Area to be Certified: _____ ha

Signature: _____

Position: _____

Operator B Information:

Operator (Company) Name: _____

Alberta Energy Regulator License Number or
Alberta Environment and Parks Approval/Registration Number: _____

Type of Specified Land: well pipeline pit mine railway roadway

Other: _____

Date of Construction: _____
