

Eckville – Medicine River and Lasthill Creek – Flood Hazard Study – Summary

Community	Town of Eckville Lacombe County
Stream	Medicine River Lasthill Creek
Basin	Red Deer River – 5C

This study delineates flood hazard areas and determines design flood levels along the Medicine River and Lasthill Creek through Eckville. The study area includes an approximate 13 km reach of the Medicine River and an approximate 5 km reach of Lasthill Creek. The design discharge for the Medicine River downstream of the Lasthill Creek confluence is 249 m³/s. The design discharges for the Medicine River and Lasthill Creek upstream of their confluence are 174 m³/s and 75.0 m³/s respectively.

The Medicine River watershed is located within the western Alberta plains. Within the study area, the most severe flooding generally occurs in the summer and is rain-driven, but spring snowmelt runoff conditions produce relatively high water levels during in most years. High flows are most likely to occur in April or July.

A digital representation of the flood hazard maps prepared as part of this study can be viewed online.
